

XGC+ Quick Start Guide

1 Start Playing Your Course More Accurately In Minutes

The Bushnell Yardage Pro XGC+ is preloaded with over 15,000 golf courses and ready to use out of the box without downloading any additional software. Within 45 days of first use, you must go to iGolf.com to register the device, which will update the preloaded course information (see reverse for details). Registration is free and takes only a few minutes. Follow the instructions below to start using your Yardage Pro XGC+ (*after charging it 6 hrs min., using the AC adapter & USB cable*).

1. Hold down the PWR button for approximately 2 seconds.
2. Move away from tall buildings and trees for unobstructed reception of GPS satellites.
3. Wait for a GPS signal to be acquired so that the nearest course can be found automatically. Select 'Play Golf' from the main menu.

The initial GPS satellites signal lock can take up to 5 minutes.

4. Once the XGC+ acquires the GPS signal, a list of courses near your location will be displayed. A manual search option is available if a GPS signal has not been acquired.

5. Select the course and then the tee box.

6. The main GPS screen shows distances to the Front, Center and Back of the green for each hole:

- » Enter button initiates Shot Distance Calculator
- » Right and Left toggle buttons switch between holes
- » Up and Down toggle buttons display custom points
- » Right and Left function buttons display Map or Score screens
- » Menu button launches the Play Menu

Lit#: 98-1600 / 05-10

If you require further assistance, please review the support documents available online at www.bushnellgolf.com

2 Register Your XGC+ and Enjoy Your Game Even More!

Complete the free iGolf.com registration to gain access to the latest course updates, download up to 30 color golf course maps for use on your device and much more. The interactive maps downloaded from iGolf.com provide distance measurements to any point on the hole, while utilizing multiple zoom levels.

1. Using the cable provided with your XGC+, connect one end to the mini USB port on the bottom of your device and attach the other end to a USB port on your computer.
2. Go to <http://www.igolf.com>, select 'Join Now', enter the requested information and select the 'Join Now' button to continue.
3. Create your iGolf.com profile and select the 'Save' button to complete the registration process.
4. To download color maps for a particular course, make sure your XGC+ is connected to the computer and that you are logged in to your iGolf.com account.
5. Select 'GPS Courses' from the header menu, enter the name of a golf course in the search bar and click the 'Search' button.
6. Select the desired course from the results list to access the course download page.
7. Select 'Download GPS & Scorecard' to download the selected course to your XGC+.
8. Repeat steps 4-7 if you wish to transfer color maps for other courses to your XGC+.
